Auto Recyclers

PREMIER SUPER ABSORBENT GRANULES

CAN DRY® is a low dust granular mineral able to absorb and retain many types of liquid spills. The unused product is environmentally inert and will not damage tile, concrete, asphalt, soil or plant life.

CLEANS UP LIQUID SPILLS and ODOURS

CAN DRY® is not affected by temperature. If stored and used as directed will not rot or mold. Safely and quickly absorbs: Water, Grease, Paints, Alcohols, Solvents, Coolants, Oils & Fuels.

IDEAL FOR

**Trash Cans, Waste Containers,
Compost Bins, and Dumpsters.**

WORK SAFE

CAN DRY® improves traction which creates a non-slip, safer work environment. **CAN DRY®** is all natural, safe for landfill disposal and is non-corrosive.

Oils • Fuels • Grease • Paints • Alcohols • Solvents • Coolants

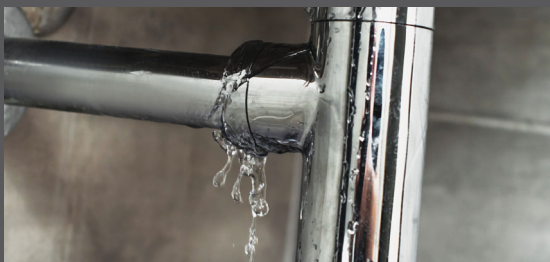

For use in
Home, Garage, Office, Schools,
Outdoors, Camping

INDUSTRIAL STRENGTH

NATURALLY SUPPRESSES ODOURS

SAFE & COST EFFECTIVE

APPLICATION

To remove oil spills or other liquid spills cover spill with a generous amount of **CAN DRY®**. Sweep up when dry.

SPILL CONTAINMENT

Pour 9 cm (3.5 inches) high around the perimeter of the spill to contain the liquid and prevent further liquid damage or contamination. Increase application where spill is larger and add more material when the **CAN DRY®** is saturated.

FLOODING

CAN DRY® can be used to clean up after flooding. Remove all excess standing water. Apply up to 3 cm (1 in) of **CAN DRY®** on top of the sub-floor. Let product sit until dry. Sweep up. Reapply if still damp. When vacuuming use a Shop Vac. Dispose of used material.

ODOUR CONTROL

Keep your garbage cans dry and odour free by layering bottom of garbage can with 3 cm (1 in) of **CAN DRY®**. Perfect for trash cans, waste containers, compost bins, dumpsters and compactors.

FOR TRACTION ON SNOW AND ICE

To assist with traction place a generous amount of **CAN DRY®** under the vehicles' wheels. **CAN DRY®** can also be used as a traction aid on walkways by sprinkling a generous amount on top of the snow/ice.

BARBEQUES

Decrease grease from adhering to bottom of grill and extend life of grill by layering bottom of grill with 3 cm (1 in) of **CAN DRY®**.

The handling and disposal of sorbents saturated with hazardous materials must be in accordance with local, State and Federal regulations.
